Education

Vanderbilt University | Master's in Computer Science

August 2025 – May 2027

Wheaton College | Bachelor's in Computer Science, cum laude

August 2018 – May 2022

Technical Skills

Programming: Python, Java, C#, TypeScript, JavaScript, SQL (PostgreSQL, MySQL), Swift

AI & Machine Learning: PyTorch, scikit-learn, NumPy, LLMs (RAG, Prompt Engineering, LangChain), Deep Learning

Cloud & Infrastructure: AWS (EC2, S3, Lambda, ECS, Bedrock), Docker, Kubernetes, CI/CD, Git

Systems & Backend: Node.js, FastAPI, .NET, RESTful APIs, OAuth 2.0, Agile/Scrum

Work Experience

LLM Engineer | HLAB

May 2026 – Present

- Architected a provider-agnostic **LLM generation client (Anthropic, OpenAI, Google)** with a **factory-based registry**, **asyncio** request batching, and **MySQL persistence**.
- Engineered a model-aware decoding-config layer to standardize sampling controls across providers, preventing production API errors and ensuring cross-model output reproducibility.
- Reduced inference costs by **~50%** by integrating **Anthropic's Batches API** as the primary scaling path for bulk document generation and optimized **prompt engineering**.

Research Assistant | Vanderbilt College of Connected Computing

November 2025 – Present

- Engineered experimental workflows for **Graph Neural Networks** on **395K-cell datasets**; optimized model training efficiency by **4x** through iterative hyperparameter tuning and architectural refinement.
- Led a systematic evaluation of state-of-the-art baselines; conducted rigorous statistical validation to identify and correct transductive bias, ensuring robust and reproducible performance metrics.

Cloud Engineer | Cloud Innovation Lab with Amazon

March 2025 – Present

- Automated video segmentation using **Bedrock**, **Transcribe**, and **PySceneDetect**; combined lexical and visual data to reduce 30-min tapes into **25 semantic segments**.
- Deployed cost-effective **AWS infrastructure (S3, Lambda, ECS)** that **scales to zero**, keeping infrastructure spend at **\$0 when idle**.

Full Stack Software Engineer | SIL Global

August 2022 – May 2025

- Shipped **10+ major features** for the Paratext 9.4-9.6 (**C#/.NET**), directly impacting **10K+ users**.
- Debugged and resolved **120+ full-stack issues** by cleaning up data flow and adding health checks, resulting in a **30% drop in reported bugs**.
- Stabilized the **CI/CD pipeline (TeamCity)** and increased **unit test coverage** to improve overall reliability.

Software Engineer Intern | Jaars

June 2022 – August 2022

- Led a team of 3 to build a **QA platform** for **2,000+ users**, handling 11 plugin integrations and **OAuth 2.0**.
- Managed a database migration (Postgres to MySQL) for 1,000+ records, ensuring zero data loss.
- Deployed the full stack via **Docker, Kubernetes, and AWS**, maintaining **99.9% uptime**.

Software Developer Intern | Yuhuan Rural Commercial Bank

June 2021 – August 2021

- Developed a cross-platform employee portal (2,000+ users) using **React/Node.js**; cut load time by **40%**.
